3. The brochure contained a number of photographs which allegedly illustrated the aftereffects of the World War II atomic bomb explosions in Japan and atom tests which had been conducted by the US in the Pacific. The pictures which supposedly showed the Nagasaki and Hiroshima explosions depicted the aftereffects of the atomic bomb at ground zero, the heat-affected area, the shock area, and the area where radiation poisoning had occurred.

4. The brochure described the specific tests as occurring in the "Wismar Islands" (possibly Bismarck Islands) in 1946. Photographs showed how the US destroyed the captured Japanese Fleet in these tests.

50X1 [redacted] there were photographs of two types of test explosions.
50X1 The photographs, purportedly taken immediately following detonation,
were of an explosion just at water level and of an explosion which
50X1 had occurred 80 meters under the water.[2] [redacted]
50X1 a clock mechanism was depicted which illustrated that the explosions
were timed in some fashion.

5. [redacted] the book
50X1 [redacted] generally discussed survival factors and
survival distances.
